Aeration, levelling, breaking down and spreading of organic matter

PASTURE HARROW SERIES 20 - REHABILITATE YOUR PASTURE

For larger field operations over 100 acres (40 hectares), where greater strength and durability are needed in a pasture harrow, the Murray Series 20 Pasture Harrow System performs above the rest. The system consists of a front drawbar, 3, 4 or 5-rank Pasture Harrow sections and heavy steel square chain mesh together with the appropriate weights. The flexibility and strength of the Murray Pasture Harrow sections easily accommodates uneven ground and stony areas of roughly cleared country which would present difficulties for rigid tines harrows. Each harrow section has a 4-point pull which ensures true tracking and proper operation of the tine section.

The heavy duty square chain mesh breaks down and distributes animal manures and other organic matter evenly across the whole pasture. This promotes a quick response to seasonal breaks and optimum pasture growth.

The Murray Series 20 Pasture Harrow is available in four working widths between 2.6 metres (8'6") and 5.1m (17'). Each set is supplied complete with front drawbar, harrow sections and chain mesh sections including weights.

SPECIFICATIONS

- High Carbon Steel Tines and Square Chain Mesh
- Coverage 0.86m (2'10")
- Tine Spacing 44mm (1 3/4")
- Tine Length 197mm (7 3/4") approx
- Centre to Centre of Front Hooks 222mm (8 3/4")
- 3 Ranks - 12 Tines or 4 Ranks - 16 Tines or 5 Ranks - 20 Tines
- Available in 2 chain mesh depths 0.76m (2'6") and 1.5m (5')
