

ROTARY TILLER FOR MINI LOADERS

The Digga Mini Tiller is the ideal attachment for ground preparation prior to turfing, planting and seeding. It turns the toughest ground into workable soil. The Mini Tiller is suited for most mini loader machines and is quality-made in Australia.

FEATURES

- 1210mm overall width with 980mm cutting width.
- Front end is designed to level out uneven ground and touch ups.
- Replaceable blades allow for effective cultivation of up to 130mm deep.
- Chain drive allows the motor to be mounted high out of the soil.
